```
01 | x, y, z = 11, 5, 18
02 | b = ["e9Db", "pc4M", "fF33", "3CZb",
03 |      "G7Jy", "Arm6", "7jHb", "7srK"]
04 | k = (x % 8, y, z % 8, y + 2)
05 | ssid = "NODE_" + hex(x * y * z)[2:].upper()
06 |
07 | if x > 8:
08 |     if y > 8:
09 |         print("ACCESS DENIED")
10 |     elif z > 15:
11 |         if x + y * 2 > z:
12 |             print(ssid)
13 |             print("-".join(b[i] for i in k))
14 |         else:
15 |             print("?SYNTAX ERROR")
16 |     else:
17 |         print("NO CARRIER")
18 | elif z > x:
19 |     print("READY.")
20 | else:
21 |     print("BREAK")
```

The program prints two lines:

line 1 > **network name**

line 2 > **password**
